Abstract

This document describes the user interface for the ShowTable module. It contains some simple examples and screenshots for the users to make using of this module easier.

Introduction

Welcome to ShowTable module. This is a module designed for displaying the results of SQL for selecting all data from the database table.

Note: When loading a very large data table, the Ferda system can freeze for a while. This is caused by the high traffic between the data-source and the Ferda system. This problem can be eliminated by some optimizations implemented by the module, however it is not the priority now.

Parts of the user interface

Main window

Main dialog window contains a list of items corresponding with those in the queried database table.

loan_id	birth_number	Salary	District	amount	payments	duration	status
4959	450204	12541	Praha	80952	3373	24	
4961	395423	9104	Tabor	30276	2523	12	
4962	620209	9893	Frydek - Mistek	30276	2523	12
