## Abstract

This document describes the user interface for the DatabaseInfo module. It contains some simple examples and screenshots for the users to make using of this module easier.

## Introduction

Welcome to DatabaseInfo module. This is a module designed for displaying the information about the datasource.

## Parts of the user interface

### Main window

Main dialog window contains a list of the data for each table in the datasource.

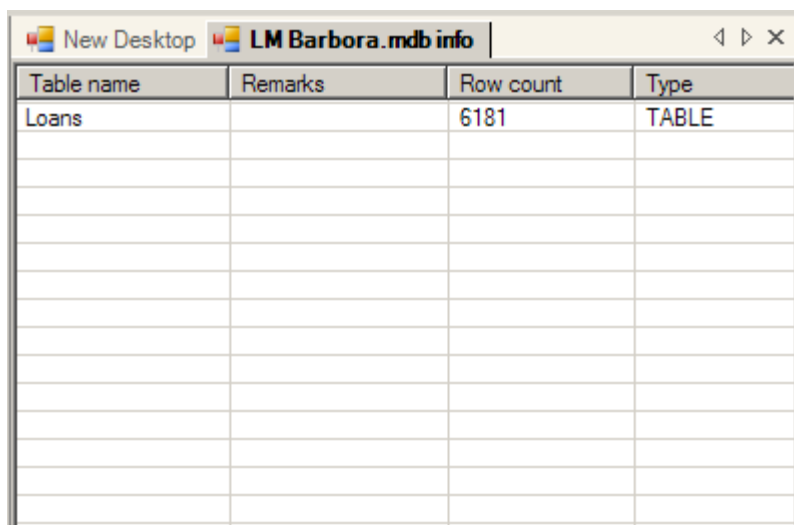

Table name	Remarks	Row count	Type
Loans		6181	TABLE

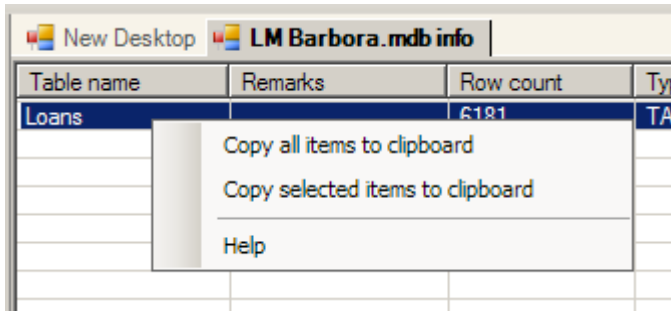

Columns in the list view are as follows:

- **Columns.**

- **Table name.** The name of the table
- **Remarks.** Remarks for the table
- **Row count.** Count of rows in the table
- **Type.** Type of the table

## Right-click menu

Right-click menu contains options to copy the information to clipboard and launching help.

- **Copy all items to clipboard.** When this option is selected, all items from the ExplainTable list are copied to the clipboard as tab separated values.
- **Copy selected items to clipboard.** When this option is selected, the currently items from the ExplainTable list are copied to the clipboard as tab separated values.
- **Help.** Opens pdf with current help
